

Does China's Energy Strategy work for Macao?

According to the National Energy Administration of China, the share of clean and renewable energy in China's electricity generation has almost doubled over the past decade, surging from 13 per cent in 2011 to 24.3 per cent in 2020. This bodes well for Macao. "Developing solar and wind energy has become China's core energy strategy," he says.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Is Macao a good place to drive an EV?

Macao is uniquely suited for EVs due to its size. In a 2021 research project, Zhang and his team found that the average Macao driver does not exceed 10,000 kilometres per year, or 27 kilometres per day. "For many families, it would be enough to charge their EVs one or two times a week," says Zhang. "EVs are perfect for a small city like Macao."

How many EV charging spaces are there in Macao?

The city currently has 200 charging spaces across 42 public car parks and seven streets, according to the Macau Electricity Company (CEM), Macao's sole energy service provider. While most integrated hotels in the city provide EV charging spaces in their car parks, they are typically reserved for guests and team members.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

How many private charging stations are there in Macao?

As a result, only 130 private charging stations have been installed in Macao over the past five years. Leong has asked the government to help install charging stations in more public spaces and even help residents install them in private car parks.
