

Macao power system enspire

Why does Macau need a power supply system?

As an international city, Macau has very high requirements for power supply quality and service quality. CEM needs advanced technologies to provide users with high-quality power and services and meet its commitment to sustainable development. CEM began automating its distribution network in 2000, completing the project in 2005.

Will Cem replace CSG power capacity in Macau by 2030?

CEM's goal is to replace the power capacity Macau imports from CSG with CEM's installed capacity from clean energy in Dawan District by 2030. To this end, Liu says, "Huawei and CEM are cooperating in a power data transmission network, OT system infrastructure construction, and a medium-voltage communication network.

What is the new energy ecosystem in Macau?

CEM believes that adequate stability, affordability, and clean efficiency are the three core elements of the new energy ecosystem. Given Macau's high cost of land and mature economy, the SAR Government formulated an energy supply strategy with CSG as the main supplier, supplemented by local power generation.

What is Cem doing in Macau?

In Macau's Dawan District, CEM is currently involved in constructing renewable energy sources such as offshore wind power and solar photovoltaic power generation. It's also involved in building hydropower renewable energy, such as pumped storage and natural gas combined-cycle power generation projects.

Why does Macau need road excavations?

As Macau's power supply network consists of underground cables, road excavations are a necessary part of supplying these large-scale projects with power and reconstructing aging infrastructure. "It's inconvenient for the general public and a challenge for CEM," explains Liu.

Is Macau a smart city?

Imbued with a unique and vibrant mix of Chinese and Portuguese culture, Macau enjoys a rich 450 years of history and remains a popular tourist destination. Today, its power industry continues to make an outstanding contribution to the city's prosperity and will form a key aspect of its transition into a smart city.
