

# Madagascar home back up battery

Is a whole home battery backup system worth it?

You'll need about three times as much power for a whole home backup system, which is about three times the price of a partial home setup. Partial home battery backup systems generally make more sense for the average American home, but a whole-home setup may be worth it if you live in an area with frequent blackouts.

How powerful is the stack'd series battery backup system?

The Stack'd Series is seriously powerful, with an impressive usable capacity of 38.4 kWh and continuous power up to 14.4 kW. Its modular design allows you to scale as needed so your battery backup system can grow with your needs. It's also our most efficient battery.

Should you install a whole-home battery backup system?

Installing a whole-home battery backup system means you won't need to break out the candles or worry about keeping the refrigerator closed during power outages. With independence from the utility grid, you can avoid the inconvenience of outages without sacrificing your daily routines.

A home backup battery gives you more flexibility to choose when you consume electricity from your utility. You can run your home off battery power during peak hours to save money. This is an option even if you don't have solar panels. You can charge your battery during off-peak hours and save that energy for times of day when electricity is ...
