

Madagascar outdoor server cabinet

What is an outdoor server cabinet enclosure?

AZE's 16U Outdoor Server Cabinet Enclosures are designed to protect your sensitive network equipment from harsh environments, with waterproof and dustproof features to safeguard it from the elements, while still keeping the equipment secure outside.

What is an outdoor server rack?

An outdoor server rack or patch cabinet is a 19-inch cabinet that has four 19-inch mounting profiles. In these profiles, you directly attach 19-inch network equipment, such as a rack server, patch panel, switch or ups. The difference between a 'normal' server rack and an outdoor server rack is that the outdoor rack is weatherproof.

Can outdoor server rack cabinets be customized?

Outdoor server rack cabinets can be customized for all Outside Plant applications - special engineering and additional equipment integration also available. Additional cabinet sizes are available. Call, email us for information and pricing.

What materials are available for outdoor server rack enclosures?

Outdoor server rack enclosures Material Options: Cold metal Steel, galvanized steel, stainless steel or aluminum steel available. Outdoor electrical cabinet Climate Control options: such as cooling fans, air conditioner, heat exchanger and Thermoelectric Cooler (TEC) available. Monitor door open status inside cabinet and provide real time alarm.

Why do outdoor server cabinets have ventilation holes?

Even with an outdoor server cabinet, ventilation is important. The temperature inside the cabinet must not rise so that the active equipment does not overheat. This is why the outdoor cabinet has ventilation holes at the front. The holes are covered so that water cannot get into the cabinet when it rains.
