

Malawi resco solar

What is Resco model solar?

The RESCO model solar is one method for installing rooftop solar cells. Under the RESCO model, the renewable energy service business develops, installs, finances, manages, and owns the rooftop solar power project. The electricity produced by the project is either supplied to the grid or to the consumer whose property the project is placed on.

What is the Salima solar project?

The project also engaged a professional chef from Lilongwe to train a team of local women to prepare and serve free, nutritious meals for the construction team each day from the on-site African Food Kitchen facility. The Salima Solar project ties in with Power Africa initiatives in the region which aim to connect more people to the national grid.

Why is TA funding Salima solar?

TA has also provided a further \$6 million Viability Gap Funding grant to the project to accelerate progress to construction. As the country's first commercial-scale solar IPP, Salima Solar has considerable potential for replication; promoting further development of Malawi's solar resource.

* Recapo is the leading supplier of solar electricity and accessory products to rural and semi-urban communities in Malawi * Under the agreement, Recapo will be selling ENGIE Energy Access's products and related services * Since 2014, Recapo Solar Systems has pioneered the use of renewable energy to replace traditional resources By Duncan ...
