

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

How much does a solar project cost in Maldives?

In 2022, 63 investors expressed interest in the third 11 MW solar project in the remote islands of Maldives, and a record low price of 9.8 US cents was received. This is one of the lowest tariffs for any small island developing state (SIDS).

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photovoltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors' bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

How will ASPIRE solar projects benefit Maldives?

In general, the projects will benefit the people of Maldives and the government by lowering electricity prices and providing quasi-budgetary support. 2014 - The first 1.5 megawatt (MW) solar project under ASPIRE had four investors' bids, resulting in a high PPA of 21 US cents per unit of electricity.

Will Maldives become net-zero by 2030?

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ambition to become net-zero by 2030 at the UN Climate Ambition Summit in December 2020.

The project entails the installation of large-scale solar panels, with an estimated investment totaling MVR 1.6 billion. Set in the Greater Male' area, this ambitious undertaking will witness the deployment of floating solar panels designed to generate an impressive 150 megawatts of electricity.

Environment Ministry has opened applications for the installation of rooftop solar panels at households as part of "Magey Solar" program. The program, funded by the Asian Development Bank (ADB), is a joint initiative of the Ministry and Fenaka Corporation with the company carrying out the installation of the solar panels.

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ambition to become net-zero by 2030 at the UN Climate Ambition Summit in December 2020.

Fenaka, in partnership with the Ministry of Climate Change, Environment and Energy, has officially launched the Magey Solar program, an ambitious initiative aimed at harnessing solar energy by installing photovoltaic (PV) systems on the rooftops of private homes across the Maldives.

The government believes this project to be of immense strategic value to the Maldives, as it will significantly contribute to replacing conventional energy sources with renewable sources, according to the ministry.

"This is the largest floating solar panel structure to be plugged in the Maldives, and we are incredibly proud here at Gili Lankanfushi to participate in finding ways forward into a more sustainable future" - Deborah Burn, Marine Biologist & ...

World Bank-financed projects ASPIRE and ARISE support Maldives" energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives" annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.
