

# Mali tcs energy

Is energy du Mali subsidized?

Energie du Mali (EDM), the state-owned electric utility, is poorly managed and heavily subsidized by the government and regional multinational banks, as the relatively high price of its electricity (average \$0.17/kWh) is insufficient to cover the cost of production and distribution (\$0.24/kWh).

What is the energy supply in Mali?

As in most sub-Saharan African countries, biomass (mainly in the form of firewood) provides the bulk of the energy supply (Figure 4). Mali has neither proven hydrocarbon resources nor a refinery; as a result, all petroleum products are imported through neighbouring coastal countries which impacts on the country's balance of payments.

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

What are the different types of energy transformation in Mali?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Mali for 2022. Another important form of transformation is the generation of electricity.

What is the electricity system in Mali?

Mali's electricity system encompasses a national grid that is owned and operated by Energie du Mali SA (EDM SA) which supplies 35 towns, including Bamako. In addition to the national grid, EDM SA manages 30 isolated centres equipped with diesel generators and two centres supplied by Cote d'Ivoire.

What does Mali's energy plan include?

Moussa Ombotimbe, Technical Advisor in charge of Energy at the Ministry of Mines, Energy, and Water of the Republic of Mali, states that the "plan includes creating solar power plants, the inclusion of transmission lines, the establishment of mini-grids, and capacity building, making it comprehensive."
