Yesterday, NASA announced that a rock spotted on Mars by its Perseverance rover contained some of the best signs yet that ancient microbial life may have once existed on the Red Planet. The rock provides ...

Nicknamed "Cheyava Falls" by the team, the arrowhead-shaped rock contains fascinating traits that may bear on the question of whether Mars was home to microscopic life in the distant past. Analysis by instruments aboard the rover indicates the rock possesses qualities that fit the definition of a possible indicator of ancient life.

A key objective for Perseverance's mission on Mars is astrobiology, including the search for signs of ancient microbial life. The rover will characterize the planet's geology and past climate, pave the way for human exploration of the Red Planet, and be the first mission to collect and cache Martian rock and regolith (broken rock and dust).

awareness to promote the importance and value of Zimbabwe's rock art. This is a joint initiative by Dr. Ancila Nhamo of the University of Zimbabwe and Dr. Hapinos Marufu of the National Museums of Zimbabwe and has been supported by the Nairobi-based Trust for African Rock Art (TARA) and the Prince Claus Fund of Amsterdam. Dr. Godfrey Mahachi
