

Who owns the Marshall Islands energy company?

Established in 1966, it is owned by 68 members--49 from the region. The Asian Development Bank and the Government of the Marshall Islands today signed agreements for a \$7 million grant to support the Marshalls Energy Company improve its performance, to improve the disaster resilience of RMI's energy...

What are the main sources of energy in the Marshall Islands?

MEC, KAJUR, the College of the Marshall Islands and the University of the South Pacific, all carry out capacity building in support of energy activities. Most of the primary energy supply (90%) comes from petroleum, with biomass used for cooking accounting for nearly all the rest.

What is a Majuro Atoll grant?

The grant provides additional funding for the project, a \$12.7 million initiative approved in 2018, to rehabilitate the fuel storage tanks and associated infrastructure on Majuro Atoll to improve the RMI's energy security. The electricity grid will be improved and MEC staff will receive training for future renewable energy upgrades.

Why is the Republic of the Marshall Islands reliant on external assistance?

Since independence, the Republic of the Marshall Islands (RMI) has been heavily reliant on external assistance, with grants averaging 60% of gross domestic product (GDP). Like other island nations in the Pacific, the RMI suffers from high and volatile fuel prices while lacking any known fossil fuel reserves of its own.

Why did the Marshall Islands declare a state of economic emergency?

In 2008, the Marshall Islands experienced unprecedented increases in the costs of imported petroleum fuel and staple-food items. The global price surge forced our government to declare a state of economic emergency, with the nation no longer able to pay for the imported diesel required to generate power.

Does Majuro have electricity?

This means that overall electrification in the RMI will at that point exceed 99%. Biomass, mostly coconut fronds, husks and shells, is a significant source of cooking energy. However, liquid petroleum gas (LPG) is now the main cooking fuel on Majuro and is becoming more popular on other islands. Two electricity utilities operate in the RMI.
