

What type of energy does Ukraine use?

Energy in Ukraine is mainly from gas and nuclear, followed by oil and coal. Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply.

What is Ukraine's energy policy?

Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply. The coal industry has been disrupted by war, and as of 2024 over 70% of electricity generation is nuclear.

How important is Ukraine's energy sector?

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's energy supply.

Does decentralisation drive energy security in Ukraine?

Despite the high investment risks, the construction of a more decentralised system has begun, increasing resilience to attack and laying the groundwork for a distinctive longer-term transition pathway. In contrast with other countries, where decentralisation has been driven by sustainability concerns, the clear driver in Ukraine is energy security.

Are Russian gas metering facilities in Ukraine causing force majeure?

Gas metering facilities on the border between Russia and Ukraine have been in the spotlight. In May 2022, the Gas TSO of Ukraine declared force majeure at the Sokhranivka gas metering station, claiming illegal actions and unauthorised gas offtakes by Russian forces.

How has Ukraine managed its electricity deficit?

The deficit has been managed by Ukraine's state-owned electricity transmission system operator, Ukrenergo, through rolling cuts to supply, limiting electricity provision in the worst-affected regions to a few hours per day.

Before joining Matrix Energy Limited, he worked with Oilsteams Limited, BOC Gas, and Metropolitan Bank. Luqman handles all the downstream operations and safety aspects of the business. His duty also focuses on terminal operations, trading, product supply & marketing, logistics, planning, and other non-traditional company operations.
