A switch to renewable energy in the sector could lower costs, reduce emissions, increase efficiency and improve energy security in the country. There is also potential to further electrify energy uses in mining. The government has announced various export-oriented projects to produce renewable hydrogen, ammonia and/or hydrogen-reduced iron.

The joint ventures involve the Renewable Energy Localization Company (RELC), which is fully owned by PIF, and Vision Industries, a Saudi firm investing in green industries and value chain. In the deal with Envision, the ...

referred to as "Saudi Arabia"), and both introduced Renewable Energy Localization Company (hereinafter referred to as "RELC"), a wholly-owned subsidiary of the ...

With its world-class renewable energy potential, Mauritania can enhance access to affordable energy and potentially enable clean energy to be converted to green hydrogen. Green hydrogen is an attractive resource for Mauritania's energy transition, both for its potential to boost investment and for its promising role in decarbonizing heavy ...

The wind power plant in the northern town of Boulénouar will also significantly increase the share of the country's energy mix, when it comes online (though timing is unclear). The significant share of renewable energy in Mauritania's total energy portfolio is impressive, especially compared to other countries on the continent.
