

Maximum insurance limit for photovoltaic panels

What is a photovoltaic insurance policy?

A major component of operation-and-maintenance costs for commercial or utility-scale photovoltaic (PV) systems is insuring against losses from physical damage or liability for losses caused to others (Speer, Mendelsohn, and Cory 2010).

Are solar panels covered under a homeowner's policy?

This means that as long as you own your solar panels and they are rooftop-mounted (additional policies may be required for ground-mounted systems), the system will be included under a homeowner's policy and covered in standard plans without raising your premium.

Are solar panels covered by a PPA?

If you subscribe to a PPA or lease your solar panels, a third party owns your system and is responsible for damage and maintenance. In this case, you will not be responsible for ensuring coverage, but you should talk to your lease or PPA provider before committing to make sure that any unforeseen damage will be covered.

Why is insurance important for photovoltaic plant operations?

Insurance is important to several aspects of photovoltaic (PV) plant operations. Insurance is often a prerequisite for financing, operating permits, interconnection agreements, and leases or as part of a power purchase agreement for an on-site PV system. The history of insurance for PV systems is short compared to other types of assets.

That means it's time to review your coverage limits. A limit is the max amount your policy will shell out for a covered loss. If a storm or an accident damages your solar panels, you'll need to pay ...
