Is New Mexico a good place to go solar?

It's no wonder that with all of the benefits of going solar in the state of New Mexico and the rising interest in clean energy among Albuquerque residents, there has been a huge boom in the number of solar installers in the state.

Will New Mexico switch to solar in 2024?

The price of solar has fallen 42% over the last ten years in New Mexico. This huge decrease in price is one of the major incentives to make the switch to solar in 2024.

How many solar companies are there in Albuquerque?

By the end of 2023, the solar industry in the Albuquerque/Rio Rancho/Santa Fe area consisted of 88 companies- 47 being installers. As a homeowner, how can you be sure you're working with the best solar company for you?

Why should you switch to solar in New Mexico?

Indeed, the list of good reasons for New Mexicans to switch to solar is long. Plus, the right solar company will make the transition easy by handling your project with integrity, exceptional customer service, and quality workmanship. Are solar panels worth it in New Mexico? Why do solar companies charge what they do?

Should you lease or buy solar panels in Albuquerque?

Although leasing a system may initially seem like an attractive option because it doesn't require the commitment to a solar loan, there are a few major drawbacks to leasing solar panel systems. The best solar panels in Albuquerque will have high efficiency, low degradation, and an excellent warranty.

Are solar panels tax deductible in New Mexico?

In 2024, both the federal and New Mexico state governments are offering tax credits to NM homeowners. These credits lower your tax liability and can ultimately cover up to 40% of the cost of your solar energy system. Switching to a solar PV system rather than relying on fossil fuels or coal can drastically decrease your carbon emissions.
