Dubai is a global leader in the adoption of solar energy, with ambitious plans to increase its solar capacity to 5,000 megawatts by 2030. This growth is being driven by a number of factors, including government support, favorable climate conditions, and a growing awareness of the environmental and economic benefits of solar energy.

With DEWA's concept of "Net Metering," you can use the electricity generated by your rooftop solar system and send any excess production to the utility grid. This system ensures that over-production isn't wasted; instead, it accumulates as credits. These credits can be used when your solar system isn't producing enough energy, such as at night.

Overview. HH Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai has called for solar panels to be installed on every roof in Dubai by 2030, as part of the Emirates vision to produce 75% of its energy from clean sources by 2050. To get there in time, the Dubai Clean Energy Strategy 2050 also calls for interim targets of 7% of ...
