Should Iraq invest in renewables?

Integrating renewables requires a large investment in grids, and Iraq's transmission and distribution networks are already dilapidated, with electricity dues largely uncollected, giving rise to technical and commercial losses that exceed 50% of generated power. Adding intermittent solar generation will be a novel challenge.

Does Iraq have an integrated national energy strategy?

Since 2012, Iraq had added one-in-every five barrels of global incremental oil supplies, but has failed to implement its own Integrated National Energy Strategy first by disintegrating gas and oil development and second by missing on gas-to-power synergies.

How much gas does Iraq produce a day?

Close to 50% of Iraq's natural gas production, which comes associated with oil output at 3 billion cubic feet per day, is flared at the wellhead, leading to acute gas shortages and emitting some 36 million tons of carbon dioxide per year.
