Keep in mind your individual micro-inverters turn the DC power from the panels into AC. They make some pretty expensive inverters that do the opposite and I believe that is what Enphase sells to those of us that would like to get off the grid. Before micro-inverters, systems were DC and sent power from your panels to chargers and batteries below.

Componentes de um sistema com micro inverter solar off grid Enphase IQ8P. O modelo da IQ8P, parte da oitava geração, inicialmente foi projetado para dois painéis, mas foi ajustado para um painel por questões de eficiência e superaquecimento. Este modelo mantém uma taxa de falhas de apenas 0,05% e lidera o mercado residencial americano ...
