What is a micro turbine generator?

Micro Turbine Generator Applications. The ARC generator has several applications: Engine Start-up, Range Extension, Emergency Power, and Hybrid Electric Propulsion. Large diesel engines and turbines require a significant burst of power to start. ARC is an ideal lightweight solution as a start-up power generator.

What is an arc micro turbine generator?

The ARC generator provides smooth DC power output and may be fueled by any heavy fuel, even gas-station diesel. Key Design Features. The ARC micro turbine generator is ultra-compact- the entire device is the size of an ordinary toolbox and weighs just over 10kg.

How do I start the arc micro turbine generator?

Connect two 10GA electrical wires (+/-) to your load and two 6mm fuel lines (supply/return) to a fuel tank of your choice. ARC has a built-in feature to automatically prime the fuel system. Use a wired remote control (included in kit) to start the ARC micro turbine generator.

Can microturbines be used as a decentralized energy source?

Microturbines benefit from immediate use as a decentralized energy source, located where hydrogen can be produced and stored locally. Through long-standing federal, university, and international research partnerships, Capstone has patented technology for the use of hydrogen and works closely with these agencies to assure a clean energy future.

Why should you use a microturbine?

Our microturbines are compact, quiet and lightweight and provide reliable energy when and where it's needed. As a thought-leader in the energy sector Capstone recognized years ago that hydrogen would play an important role as a key part of the future of renewable, green energy landscape.

What type of fuel does a Capstone microturbine use?

Capstone offers a comprehensive lineup of clean-and-green microturbines that are scalable from 10kW to 30MW and can operate on a variety of gaseous or liquid fuels including: Natural Gas, Associated Gas, LPG/Propane, Flare Gas, Landfill Gas, Digester Gas, Diesel, Aviation Fuel and Kerosene.
