

What is the global microgrid market size?

The global microgrid market size was estimated at USD 76.88 billion in 2023 and is expected to grow at a compound annual growth rate (CAGR) of 17.1% from 2024 to 2030. Rising power demand in developing countries including Mexico, China, India, and Russia as a result of growth in household and industrial sectors is expected to be a driving force.

How big is the microgrid market by 2033?

By 2033, the microgrid market size is expected to progress at a 12.3% CAGR. Government stimuli and environmental problems spur the adoption of hybrid microgrid. Manufacturers should prioritize scalability, integration with renewable energy sources, and regulatory compliance to prosper.

What are the key factors affecting the microgrid market?

The microgrid market is expected to have a robust growth during the forecast period, primarily due to two main factors, i.e., the global demand for clean energy generation and a self-sufficient source of power generation in times of crisis or grid disconnection.

What are the major trends in the microgrid market?

A significant trend in the microgrid market is the integration of renewable energy sources. Efficiency is improved by the emergence of smart microgrid with sophisticated control system. Energy storage innovations are essential to the market growth of microgrid. Adoption of microgrid is encouraged by government regulations and incentives.

How is the microgrid market segmented based on grid type?

Based on grid type, the microgrid market is segmented into AC microgrid, DC microgrid and hybrid. The hybrid segment is set to expand at a CAGR of over 20.9% through 2032. Growing adoption of solutions offering substantial economic advantages by reducing energy costs and providing financial resilience is fostering the product demand.

Why is the microgrid market so competitive?

Due to rising consumer demand for energy sustainability and resilience, the microgrid market is highly competitive. To provide scalable and economical solutions, the key players in microgrid innovate consistently. Entrepreneurs should concentrate on market trends in microgrid, regulation changes, and developing technology.
