Take your camping, overlanding, and everyday charging experience to the next level with the Cascadia 4x4 VSS System(TM) hood mounted solar panel system.

What brands can I buy a Cascadia 4x4 VSS system?

Sign up to receive 5% off your first order, and be the first to know about future discounts and new product releases. See our selection of hood solar panels. The Cascadia 4x4 VSS System is available for a range of vehicle brands including Jeep, Ford, Toyota, Landrover, and many more.

How many wires does a Cascadia 44 solar panel have?

The solar panel has just two wires, positive and ground. You'll want to run a solar charge controller MPPT device between the panel and your house battery. Cascadia 4x4 offers these as an option, but our LR3 has already been upgraded with a RedArc BCDC125 DC-DC converter which is prewired for solar.

What is the best solar system for overland vehicles?

For those who need a full-time solar solution on an overland vehicle, the VSS might be your best bet. It's lightweight, low-profile, and makes the most out of limited real estate. The kit seems well-made -- and very well-documented and supported.

How long does a hood-mounted solar system last?

It generally lasts 24 hours doing those tasks, but only charges when the car is running. Hood-mounted solar allows me to charge while stationary, without removing gear from my roof or setting up external panels at camp. Solar allows me to stay parked at camp and keep everything powered for days -- if there's sunshine, that is.
