

Mongolia energos infrastructure

What is Energos infrastructure?

New Fortress Energy (NFE) and Apollo have announced the creation of a new \$2bn liquefied natural gas (LNG) maritime platform called Energos Infrastructure. Formed as part of a previously announced joint venture (JV), Energos is the owner and operator of 11 LNG infrastructure vessels.

Who owns Energos infrastructure?

Energos Infrastructure, an international marine LNG infrastructure company, majority-controlled by Apollo-managed funds and minority shareholder New Fortress Energy Inc., has completed the acquisition of two state-of-the-art FSRUs from affiliates of Dynagas.

How can Mongolia tackle its energy and economic security concerns?

Notably, Mongolia can tackle both its energy and economic security concerns with one approach. Mongolia has the potential to sustain its domestic electricity demand through renewable energy sources such as solar, wind, and hydro.

What are Mongolia's Energy goals?

The government of Mongolia has set targets to increase the share of generation capacity from renewable energy sources to 20% by 2023 and 30% by 2030, and to build export-oriented power plants.

Why should Mongolia improve transport and Energy Services?

Improving transport and energy services will help to develop the productive sectors of the economy, diversify the sources of economic growth, and build the basis for stronger regional linkages for Mongolia so the country is able to harness the benefits of broader regional interconnectivity.

Can Mongolia sustain its domestic electricity demand?

Mongolia has the potential to sustain its domestic electricity demand through renewable energy sources such as solar, wind, and hydro. It should also view exports of renewable energy into neighboring countries as an alternative source of economic security. Energy as Electricity
