

Monolithic power systems Curaçao

Who is monolithic power systems?

Monolithic Power Systems is headquartered in Kirkland, Washington. The company designs, develops, and markets for communications, storage and computing, consumer electronics, industrial, and automotive markets, in addition to supporting the electrification of transportation.

What is monolithic power control?

Monolithic makes highly sophisticated power control chips that go into a range of technology applications. The power and heat burdens on artificial intelligence chips has grown in recent years, making the AI segment the biggest growth driver for Monolithic over the past couple of years.

Why did Monolithic Power Systems (MPWR) rally 5% today?

Shares of Monolithic Power Systems (MPWR 4.74%) rallied hard today, up 5% as of 3:15 p.m. ET. Monolithic was beaten down in November on fears of market share losses in its high-growth artificial intelligence (AI) segment. However, with shares down 35% from their recent highs, Monolithic found one more defender on Wall Street today.

How many locations does monolithic power systems have?

It operates in more than 15+ locations worldwide. Monolithic Power Systems (MPS) provides power circuits for systems found in cloud computing, telecom infrastructures, automotive, industrial applications and consumer applications. Monolithic Power Systems, Inc. was founded in 1997 by Michael Hsing, who is the current CEO.

Will monolithic power lose market share in Blackwell modules?

Of course, Monolithic Power could lose market share in Blackwell modules for other reasons, such as the desire for Nvidia to diversify its sources of power controllers. Still, with the need for power solutions increasing across a variety of applications, Monolithic's revenue and profits should still grow in the years ahead.

Does monolithic have performance issues?

It should be noted that after the Edgewater note, Monolithic issued a press release saying it had no performance issues with its products, and that it was still in Nvidia's next-generation systems.

The MPS MagAlpha family of magnetic angle position sensors offers a revolutionary way to measure angles. Leveraging more than a decade of experience, the MagAlpha range offers unique performance advantages compared to rival magnetic sensing technologies.
