

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium in Montserrat, which was published in 2020.

Who is involved in the re-sat project in Montserrat?

The RE-SAT project (Phase 2) in Montserrat acknowledges the invaluable assistance from the Montserrat Ministry for Communications, Work, Energy and Labour (MCWEL), the GIS unit at the Ministry of Agriculture, Trade, Lands, Housing and the Environment; the Montserrat Utilities Limited (MUL), and the Statistics Department.

What are the challenges faced by Montserrat's re-sat project?

In-country challenges: o Timing and relevance are important for co-production: The RE-SAT project was well received by Montserrat due to their ambitions to transition to renewables as they saw an immediate opportunity to exploit the platform to their advantage. (Montserrat Energy Policy 2016-2030).

Does Montserrat need a geothermal plant?

To go beyond this, Montserrat is developing plans to ensure the electricity system can operate reliably. The target of 100% was based on information provided from the 2010 geothermal study⁴, and an Early Market Engagement exercise in 2017 to procure a 2.5-5MW geothermal plant which would satisfy 100% of the Montserrat energy requirement.

How has re-sat impacted Montserrat?

A significant early impact that RE-SAT has had in Montserrat include: 1. The development of a wind resource evaluation to explore the potential for wind. 2. The exploration of potential scenarios to achieve 100% renewable penetration and testing the results from an Integrated Resource Plan conducted by external consultants.

Tesla is a well-known name in the renewable energy industry. Homeowners can use their products to optimise energy efficiency and reduce reliance on grid energy supply. Easily manage system requirements and set levels to ensure you achieve your energy goals via the Tesla App.
