Who has installed a 250kW solar PV project in Montserrat?

The awarding of a contract to Salt Energy Company for the installation of a 250KW Solar PV Project in 2018 as the first phase 250KW Solar photovoltaic (PV) Project. The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019.

Why do we need solar panels in Montserrat?

The use of Solar Panels meets one of the Governments priority needs which is to improve energy security by slowly transitioning to renewable energy. The incorporation of Solar into the Grid on Montserrat, resulted in a 13% renewable energy input on the grid, which is 3% above the European Union's key performance indicator (KPI) of 10% .

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Does Montserrat need a geothermal plant?

To go beyond this, Montserrat is developing plans to ensure the electricity system can operate reliably. The target of 100% was based on information provided from the 2010 geothermal study⁴, and an Early Market Engagement exercise in 2017 to procure a 2.5-5MW geothermal plant which would satisfy 100% of the Montserrat energy requirement.

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium⁶ in Montserrat, which was published in 2020.
