

Does Myanmar use solar power?

Myanmar has rich technical solar power potential, which is the highest in the Greater Mekong Subregion. However, in terms of installed capacity, Myanmar lags largely behind Thailand and Vietnam. Even so, the country does utilize solar power.

Where is Myanmar's first solar power plant located?

Myanmar's first solar power plant is located in Minbu, Magway Division. The plant produced 40 megawatts (MW) of electricity in its first phase of operations and will produce 170 MW once fully operational.

Can solar power help a disadvantaged population in Myanmar?

"Moreover, solar can help ensure a just energy transition for citizens affected by energy poverty... Furthermore, 75-85% of Myanmar's population of lives within a 25-50-kilometer radius of high voltage power lines, which makes for ideal locations to develop medium- and large-scale solar projects," they noted.

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

What are photovoltaics used for in Myanmar?

In rural areas of Myanmar, photovoltaics are used for charging batteries and pumping water. Approximately 70% of Myanmar's population of 50 million live in rural areas. Myanmar opened its first solar power plant in Minbu, Magway Division, in November 2018.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

The 30-megawatt Thapyaywa Solar Power Plant project was implemented by Clean Power Energy (CPE) Co., Ltd under the Build Operate Own system. It's the second solar power project completed in Myanmar, generating more than 200,000 kilowatt-hours electricity per day and 70.599 million kilowatt-hours per year.
