

Namibia solar frontier

Does Namibia have a big solar project?

Namibia has much larger solar and renewable energy development aspirations, as well. Both Namibia and neighboring Botswana are working with the World Economic Forum's (WEF) Global Future Council on Energy to develop a huge, five-gigawatt (GW) solar power project over the next two decades.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Are Botswana & Namibia ready for solar power?

Today, Botswana and Namibia are poised to change this trend," highlighted Andrew Herscowitz, coordinator for the USAID-led Power Africa program. Namibia's solar power potential is enormous, with an average 300 days per year of sunshine. It's also the driest country on the African continent.

Where is Namibia's First Solar power plant located?

Nampower just recently acquired the nation's first utility-scale solar power facility. Located in Mariental in the southern part of the country, Spain's Alten Energias Renovables and Nampower, with Namibia's Mangrove, Talyeni and First Place Investment contributed to the development of the 45.5-MW solar power plant.

Does Namibia have a solar market?

Namibia is benefiting from the global expansion of the solar market, which is reducing costs and improving the efficiency of solar photovoltaic panels and related equipment. --Nampower General Manager Kahenge Haulofu was quoted in an African news service's report. Namibia has much larger solar and renewable energy development aspirations, as well.

Does Namibia have solar irradiance?

Namibia's solar irradiance levels. Nampower expects to begin construction of its four utility-scale renewable power facilities this year and bring them online in 2022, with the utility financing the projects with internal resources, according to an African news source.

Japanese solar manufacturer Solar Frontier has identified the UK as one of its key three European markets. Speaking to Solar Power Portal, Thomas Haering, Solar Frontier's sales director for Europe and the Middle East explains the company's increased focus on the European solar market, specifically the rapidly growing UK market. ...
