

As of 2022, Cape Verde's electricity consumption heavily relies on fossil fuels, with more than 80% of its electricity generated from such sources. This leaves about 16% of the electricity coming from low-carbon, clean energy technologies. The contribution from low-carbon sources is mainly from wind energy, accounting for around 14%, and solar energy, contributing a smaller ...

On Cape Verde, power plugs and sockets (outlets) of type C and type F are used. The standard voltage is 220 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. Buy a power plug (travel) adapter. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection ...

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

From design to engineering and O& M Services, including technical support, WinPower delivered a turnkey solution for a new power plant. System capacity was enhanced in a total of 3,2 MW, reliability was ensured with no blackouts, ...

Important information for European visitors to Cabo Verde: As of 1 January 2019, there is no visa requirement anymore for citizens of most European countries (incl. all EU members) visiting Cabo Verde. However, all non-resident visitors must henceforth pre-register and pay an airport security tax of 3400 escudos. There are 3 ways how to do this:
