

National solar bracket ranking

What is the solar Scorecard survey?

Using the Solar Scorecard questionnaire survey, we evaluate solar manufacturers that represent 80% of the market share based on the National Renewable Energy Laboratory (NREL) data as well as publicly available trade industry market research. The Solar Scorecard will also score companies who fall into the following categories.

Do solar companies earn a lot of points?

Solar companies that use brands within the top 20 list for solar panels (and/or outside the top 10 for inverters) earn fewer points, while those that use brands outside that earn even fewer points.

Which countries have installed the most solar panels in Europe?

The Netherlands continued to massively install PV, with 3,3 GW after 3 GW in the previous year and Poland continues its GW-scale expansion. Greece restarted PV installations after years of pause and in general, the European market benefited from a, overall growth.

What factors should you consider when choosing a solar installer?

Here are other factors that are worth considering when choosing a solar installer: We believe that comparison shopping is important, especially with a big purchase like solar. We therefore award most points to the companies that assist consumers by readily sharing information about system details and prices.

What makes a good solar installer?

Those would be the installers who use high-quality products, demonstrate superior workmanship, have established track records, and deliver reliable after-sales support. By the same token, we also want to weed out the bad solar installers: the companies that perform low-quality installations and disappear once the job is done.

What is the solar scorecard project?

The Solar Scorecard Project maintains SVTC's commitment to environmental sustainability and clean production, improved health, and democratic decision-making for communities and workers most affected by the high-tech revolution. It's not too late for PV to fulfill the promise of a safe and sustainable alternative to fossil fuels.
