Electrical distribution cabinets are highly specialized cabinets focused on precise management and control of reactive power within electrical systems. Reactive power, alternating between sources like generators and consumers, is characterized by fluctuating nature that, despite its presence, doesn't perform useful work.

For example, Nepal Power Exchange Limited, a private sector company, and India's Manikaran Power Limited signed a memorandum of understanding on energy trading in January 2002. The deal ends the monopoly of the state-owned Nepal Electricity Authority in energy trade. Nepal Infrastructure Development Bank also promotes a power trading company.
