Prior to joining NET Power, Mr. Patel worked at Barclays investment banking division, serving as Director of Global Natural Resources from March 2017 to May 2020, as Vice President of Global Natural Resources from March 2014 to March 2017 and as an associate ...

This MOU marks Net Power's initial entry into California's power market and positions CTV as an early strategic partner in the deployment of Net Power's power technology. Including this ...

Unlike existing technologies, the NET Power Cycle is closed to the environment. NET Power works by combusting natural gas with pure oxygen in a combustor, producing CO<sub>2</sub> and water. We mix this with recirculated CO<sub>2</sub> and use it to spin a turboexpander, producing power. When the turboexpander exhaust cools, water and byproducts are removed.

Advanced Power Energy Solutions (APES) was established in 2011. The company's core business is providing consultancy, services, solutions and material for construction and development projects from design to supply to installation; as well as high-end electrical equipment to the key consumer, commercial and industrial sectors in Cambodia.
