What is New Caledonia's energy mix?

New Caledonia's energy mix consists of 97.7% fossil fuels, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. The metallurgical industry consumes 61.2% of the total energy consumption of the territory.

What will totalenergies do in New Caledonia?

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

Why do we support New Caledonia's energy transition?

We are very proud to support their energy transition, and that of New Caledonia, said Thierry Muller, CEO of TotalEnergies Renewables France. "As industrial firms, we think and act responsibly. Our two companies are committed to protecting natural resources and biodiversity, and to improving the situation of local communities.

How does Prony resources contribute to New Caledonia's development?

A participant in the global energy transition, Prony Resources sustainably contributes to New Caledonia's development by processing its nickel and cobalt resources in accordance with the highest industrial and environmental standards.

What is the role of the Caledonian Energy Agency?

The Caledonian Energy Agency's role is to implement the energy transition scheme set out by the government and to contribute to the development of the electrical system. It also promotes the rational use of energy and the development of renewable energies.

Total Quadran, a wholly owned Total subsidiary involved in the production of renewable electricity in France and its overseas territories, has initiated Helio Boulouparis 2, a ...

Renewable electricity is the share of electricity generated by renewable power plants in total electricity generated by all types of plants. New Caledonia renewable energy for 2015 was 14.09%, a 2.42% increase from 2014.; New Caledonia renewable energy for 2014 was 11.67%, a 8.84% decline from 2013.; New Caledonia renewable energy for 2013 was 20.51%, a 0.4% ...

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year ...

The first New Caledonia Energy Transition Plan (2016-2021) sets out 91 measures to encourage the energy transition of provinces and municipalities. The measures are in the form of practical ...

Despite its natural resources and abundance of renewable energy sources, New Caledonia was still 97% dependent on fossil fuels in 2019, with more than 5,200,000 tons of CO2 emitted per year. However, the government's goal is to reduce the community's CO2 emissions by 35% and to double the production of renewable energy by 2030. Challenges that ...

JAKARTA, Indonesia (AP) -- Global nickel prices have soared since deadly violence erupted in the French Pacific territory of New Caledonia last week.. The overseas territory, which has been under French rule for over 170 years, is a major global producer of the critical material that is needed to make electric vehicle batteries, solar panels, steel and other ...

Energy transition in New Caledonia In line with COP21 (2015 United Nations Climate Change Conference), New Caledonia is committed to its energy transition. Guided by the Agence Calédonienne de l'Energie (ACE), the New Caledonia Energy Transition Scheme (STENC) defines the island's energy policy up to 2030.

New Caledonia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

New Caledonia is dedicated to this approach and plans to develop projects consistent with its vision. In 2019, there were 3924 companies working in environment-related activities, they represented 3,1% of the territory's companies and generated 3500 jobs.

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.. Between 2022 and 2025, the ...

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources...

We are mainly active in New Caledonia and Wallis and Futuna through our retail activities. We are also a major player in the renewable electricity generation sector. We lead several community ...

The jump in prices came at the same time the Paris-based International Energy Agency said in a report that there could be future supply shortages of critical materials\_ including nickel\_ driven by "rapid" EV demand growth, mine closures and slowing investment. ... New Caledonia's mining industry is struggling to compete against Indonesia ...
