When will Leoch's new battery manufacturing plant in Mexico be fully operational?

LEOCH's Chairman, Dong Li, announces new battery manufacturing plant in Mexico will be fully operational by year's end. September 21, 2023: LEOCH's new battery assembly plant in Mexico will be operational by the end of this year, owner and chairman Dong Li has told Batteries International.

Will the US start producing batteries in Mexico in 2023?

"We have already prepared for 2023 investments from companies from South Korea, China, and a program agreed with the US to start producing batteries in Mexico, we hope in the third or fourth quarter," foreign minister Marcelo Ebrard said, according to local paper La Jornada.

Can New Mexico be a leader in the energy transition?

Mayer also pointed to the project's potential to "allow New Mexico to be a leader in the energy transition," serving 1.1% of New Mexico's energy load in accordance with the state's goal to supply 50% renewable power by 2030 and Santa Fe's 25-year plan for sustainability.

Will a solar project occupy a 680-acre tract in Santa Fe County?

Santa Fe County held a conditional use permit hearing last week for a solar project that, if approved, would occupy a 680-acre tract inside the county. The project, proposed by Virginia-based solar company AES Corp., promises to supply 96 megawatts of power, with 48 MW of battery storage capabilities to store and deliver energy across New Mexico.

The plot of land (centre) where the project will be built. Image: Airbus, Maxar Technologies, Google. A county authority in New Mexico, US, has approved an industrial revenue bond (IRB) to support the development of a battery energy storage system (BESS) project from Blackstone-owned developer-operator Aypa Power.

In partnership with Binghamton University, NY-BEST is leading the effort to catalyze rapid growth in the energy storage industry through the New Energy New York (NENY) Supply Chain Project through this comprehensive database of NY companies that are engaged in producing materials, components, and sub-assemblies and/or performing services in support of production of ...

The project, proposed by Virginia-based solar company AES Corp., promises to supply 96 megawatts of power, with 48 MW of battery storage capabilities to store and deliver energy across New Mexico.

The New Mexico Public Regulation Commission has approved an application from PNM to add 309.5MW of energy storage to portfolio by summer 2026. Skip to content. Solar Media. ... a certificate of public convenience and necessity (CCN) for the construction of a 60MW utility-owned battery energy storage system

(BESS) and a power purchase agreement ...

D. E. Shaw Renewable Investments (DESRI) says the Carne Solar Project (Carne) has received New Mexico Public Regulatory Commission (NMPRC) regulatory approval of its offtake contracts with El Paso Electric (EPE). Carne is a 130 MWac solar + 65 MWac battery storage facility located in Luna County, N.M. "The Carne project will deliver new, cost-effective ...

PNM submitted the application with the state regulator on 25 October last year, following a summer which saw the utility twice surpass its record peak electricity demand consecutively on 17 July and 18 July 2023. The NMPRC published an order on its online electronic docketing system approving the application on 31 May. Clenera solar and storage ...

Bloomberg -- China's Contemporary Amperex Technology Co. Ltd., the world's biggest maker of batteries for electric vehicles, is considering at least two locations in Mexico for a manufacturing plant to potentially supply Tesla Inc. and Ford Motor Co. ().The battery manufacturer is considering Ciudad Juarez, in the state of Chihuahua, and Saltillo, in ...

FREMONT, Calif., May 28, 2024 (GLOBE NEWSWIRE) -- Enphase Energy, Inc. (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery ...

In 2023, New Mexico was the nation's second-largest crude oil-producing state, after Texas, and it accounted for more than 14% of the nation's total crude oil production and about 13% of U.S. total proved crude oil reserves. 26,27 New Mexico's crude oil production has increased significantly since 2010 and more than doubled since 2018. 28 Most of the increased output comes from ...

The project will account for a sizeable chunk of New Mexico's mandate of 2 GW/7 GWh of utility battery energy storage capacity by 2034. The project will account for a sizeable chunk of New Mexico's mandate of 2 GW/7 GWh of utility battery energy storage capacity by 2034. Solar. Commercial and Industrial; Community Solar;

Leoch chairman Dong Li said in a regulatory filing in Hong Kong on March 24 that it chosen Mexico because of its unique geographical location and "export policy advantages" for the region -- such as the USMCA free trade agreement ...

PNM, the largest utility in New Mexico, has identified battery energy storage as a key component in its plan to make its electric generation 100% carbon-free by 2040, five years ahead of the state's goal. Corazon will interconnect to the grid at Pajarito Substation, which is located centrally to PNM's system, to store and dispatch energy ...
