

How much would Jordan pay China to buy Amman's power plant?

If the original agreement holds, Jordan would have to pay China a staggering \$8.4 billion over 30 years to buy the electricity generated by the plant. Laborers flown from rural China toil in the shadow of the giant station, some 100 kilometers (60 miles) south of Amman.

How much green hydrogen will Jordan have in 2030?

Jordan will unveil its green hydrogen strategy, with targets for 2030 and beyond. "Today, we expect some 500 (or) 600,000 tons (of green hydrogen) before 2030 and we have other targets towards the year 2040, 2050," Kharabsheh said.

How much natural gas does Jordan use a day?

Jordan is also looking to boost production at its Risha natural gas field, currently at around 30 million cubic feet per day "to 200 million cubic feet per day by 2030," he said. There are plans to expand natural gas use domestically as well, he said. Local fuel prices are determined by energy prices on international markets, he said.

Which countries are interested in Jordan's Green Hydrogen plans?

He said companies from South Korea, Japan, the United Arab Emirates, Saudi Arabia, Germany, the United States and Britain have expressed interest in Jordan's green hydrogen plans. Preliminary agreements on green hydrogen are expected to be signed "during the coming two months," he said.
