

What are the new developments with photovoltaic (PV) panels?

In this article, we will discuss the recent developments with photovoltaic (PV) panels, including new aesthetics like clear solar panels, bi-facial (double-sided) panels, efficiency improvements, and solar inverter integration.

Does ProfiCAD support photovoltaic circuit diagrams?

ProfiCAD supports the drawing of photovoltaic circuit diagrams. In addition to the common electrical engineering symbols, the library includes symbols such as solar cells, photovoltaic panels, solar collectors, inverters, etc. Should you need more symbols, you can create them in the symbol editor. Some sample drawings (click for full size):

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m²/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.

How much space does a photovoltaic module occupy?

Photovoltaic modules installed on a sloping roof or facade occupy an area of approximately 8 m²/kWp. Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m²/kWp, avoiding shading between the rows of modules.
