

Yanmar has acquired TEDOM Group, a leading global manufacturer of cogeneration units and provider of comprehensive solutions, maintenance and services for decentralized energy systems. Prague, Czechia (September 5, 2024) - Yanmar Energy System Co., Ltd. has entered into an agreement with Jet Investment to acquire 100% of the shares in ...

Power generation systems (emergency power generators, perpetual and co-generation systems) Drive system (for pumps, industrial machinery, etc.) Solar power systems; Remote monitoring systems; History : March 2003: Company founded To adapt to the rapidly changing energy system business, YANMAR ENERGY SYSTEM CO., LTD.

YANMAR's Combined Heat and Power (CHP) system uses an internal combustion engine, powered by clean natural gas, to produce both heat and electric power. Because of this high-powered energy collaboration, energy costs are reduced by 20-50%. CHP applications involve the recovery of wasted engine heat to produce excess thermal energy and ...

Also, the EHR can be integrated into a hybrid power generation system using diesel or spark-ignited generators or connected to the grid and photovoltaic modules. The main goal of the EHR is to guarantee a higher energy efficiency and optimize emissions and noise. It's the HIPOWER-designed management system that lets operators select the most

Yanmar's reliability stems from the core technologies that drive our systems. The primary component of the Yanmar CHP and VRF systems is our Yanmar-designed, lean-burn Miller Cycle Gas Engine. The lean-burn system optimizes ignition timing and matches the excess air intake, reducing NOx emissions and creating low fuel consumption.

Weaver Heating and Air & YANMAR Energy Systems. posted Monday, July 8, 2024. YANMAR was invited to attend a meeting with our dealer, Weaver Heating and Air, at a large training facility in Georgia. We were able to introduce the YANMAR VRF products to Weaver's customers. Which allowed us to offer a better solution than just replacing the rooftop ...
