

Is Niger a coup?

The State Department today announced that the U.S. officially recognizes as a coup the illegal, July 26 overthrow of the government of Niger.

What can us do in Niger after a coup?

U.S. military operations in Niger are now limited to flying intelligence, surveillance and reconnaissance aircraft to ensure the continued safety of the U.S. personnel who remain in the country. During a background briefing today, an administration official said recognition of the coup has changed what the department can do in Niger.

Why did the US hold off on declaring Niger a coup d'etat?

The US military mission in Niger is one of the main reasons why the US held off so long on legally declaring the situation a military coup d'etat, instead engaging in extensive diplomacy to try to reverse the Nigerien military takeover, officials previously told CNN.

Does Niger have a radio station?

Niger's Minister of Communication Raliou Sidi Mohamed announced that the decision would take effect immediately. BBC programmes, including in Hausa, the most spoken language in Niger, and French, are broadcast in the country through local radio partners, reaching 2.4 million people in the country this year - about 17% of the adult population.

Is Niger a member of ECOWAS?

Niger is a member of ECOWAS, which has already suspended Guinea, Mali and Burkina Faso from membership due to successful coups in recent years.

Are Niger Armed Forces preparing for a military intervention?

Niger's armed forces have been bringing in reinforcements to the capital to prepare for a potential military intervention, a military source told CNN, just hours after the military junta running the country refused to abide by an influential regional bloc's deadline to cede power.

Niger's government also announced plans to "file a complaint" against RFI for "incitement to genocide". It claimed that RFI was a propaganda mouthpiece for former colonial power France.

And the impact could be felt more widely - although Niger accounts for less than 5% of the uranium produced globally, in 2022 it accounted for a quarter of the supply to nuclear power plants ...
