

# Niger polaron solar energy

Does Niger have solar power?

Before moving ahead, further data need to be collected and analysed to ensure their potential and viability. Niger enjoys high solar radiation conditions in all eight of its regions. Average solar radiation is 5-7 kWh/m<sup>2</sup> per day (figure 9), and there are seven to ten hours of sunshine per day on average.

How has solar technology been promoted in Niger?

Solar PV and other solar energy technologies continued to be promoted in Niger through various outlets, including the national school television programme. Solar technology installation also continued, largely in PV pumping areas and through education and health infrastructure electrification.

Who is polaron solar energy?

Polaron Solar Energy is Canada's most reliable and trusted Solar Company. Incorporated in 2013 in Ontario, Polaron has grown to be Canada's most trusted residential solar company, helping over 6,000 homeowners go solar. We expanded our services all over Canada in 2017 and now have operations in five provinces: ON, AB, and NS.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.
