Virtual Power Plants aggregate small-scale energy generation sources into a larger virtual network for the purpose of power production. They can be used to support the grid when demand for electricity is too low or high and help facilitate the integration of renewables as we begin to modernise our electricity networks.

Discovery Energy SA Pty Ltd Andrew Adams, Managing Director. Mr. Adams has over 40 years of experience in the upstream oil and gas industry spanning technical, commercial and corporate roles with large and small companies including Amoco Canada and Santos Ltd where he gained Cooper Basin experience relevant to Discovery Energy.
