Throughout 2022, SunCulture itself subsidised its product offerings in anticipation of the ability of the company to claim carbon credits for the units sold. In essence, SunCulture enabled ...

SunCulture is committed to develop innovative products that meet diverse needs at affordable prices. And, allow our customers to harvest solar energy without compromising quality or efficiency. Insights from customer survey. In March 2020, 60 Decibels conducted an impact survey on 150 SunCulture customers.

At SunCulture, we strive to solve the biggest daily challenges of smallholder farmers. We use off-grid solar technology to provide our customers with reliable access to water, irrigation, lighting, and mobile charging, and we can do all of ...

Today SunCulture's product cost just \$400 per acre compared to over \$1,000 for traditional drip irrigation (typically powered by petrol generators due to lack of connectivity to the national grid). In addition to market competitiveness, SunCulture's use of alternative, clean energy makes it an attractive destination for capital.

SunCulture's solution is to provide irrigation systems at a price point that the average small farmer can afford. With irrigation, farmers can have up to 3 growing seasons per year and produce more water-intensive, higher ...

Start your earning journey with SunCulture by referring friends and family. Earn Ksh. 2,000 for each successful referral when they purchase our solar irrigation products. Share the benefits of SunCulture and double your earnings. Learn how to participate and ...

SunCulture enabled farmers to benefit from the carbon markets by reducing prices, thus taking on the risk of carbon credit realisation in favor of offering reduced prices to its customers. For SunCulture's entry-level product i.e., ClimateSmart Direct + RainMaker2, this represented a 25% reduction in price compared to true price.
