

North Macedonia ced solar panels

Why is EBRD launching a solar PV plant in North Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "This is a very important project for the country's energy transition. It is a continuation of our previous work in backing the ambitious decarbonisation plans of North Macedonia by organising solar PV tenders and constructing the first-ever utility scale solar PV plant in the country.

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

What is North Macedonia's just energy transition investment platform?

North Macedonia today launched a just energy transition investment platform to guide its far-reaching plans for a low-carbon and just transition of the electricity sector.

Who built the largest solar power plant in North Macedonia?

Slovenia's energy group GEN-I completed the construction of the largest solar power plant in North Macedonia and connected it to the grid in September, four months ahead of the government's deadline.

How much solar power does North Macedonia have?

Solar power Built on a former lignite open pit mining site, North Macedonia's Oslomej solar park will have an installed capacity of 120 MW when fully completed. ¹⁶⁹; Ciril Jazbec

Why is Gen-I launching a solar power plant in North Macedonia?

The start of operation represents an important milestone for the expansion of GEN-I in the implementation of large solar power plant projects and the production of carbon-free electricity as well as a key contribution to the so-called Green Scenario of North Macedonia under the Strategy for Energy Development.

Located in the Northern Temperate Zone, Skopje, North Macedonia (coordinates 41.9985 latitude and 21.4313 longitude) is highly suitable for photovoltaic (PV) solar power generation. In terms of seasonal performance, the average energy production per day for each kilowatt of installed solar capacity varies: 7.37 kWh during summer months and 5.54 kWh in spring reflect a higher level ...
