

Is North Macedonia reliant on fossil fuels?

According to the national and international statistics, such as those run by the World Data and the International Energy Agency, North Macedonia remains reliant on fossil fuels<sup>28</sup>. Majority of its total energy mix, both on supply and demand side, still falls under the category of fossil fuels (Figure 2), mostly due to the usage of coal and oil.

What is the solar power potential of North Macedonia?

Solar power potential The solar potential of North Macedonia is clearly the most prominent clean energy resource in the country.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Are wind power projects a good opportunity for North Macedonia?

Nevertheless, for the time being, there is no visible resistance and wind potential remains. Just as with any future exploitation of renewable energy, wind power projects can be a good opportunity for citizen participation and creation of energy communities in North Macedonia.

Is North Macedonia a good place to invest in solar power?

For small-scale investments, the market remains a battlefield where larger energy players are bound to win. The fact that North Macedonia, within a very short period, got on the way of securing over 135MW of installed capacity for solar power should be celebrated.

What is the energy strategy for North Macedonia?

The Ministry of Economy of North Macedonia announced earlier in 2020 that "the (energy) strategy envisions investments in photovoltaic power plants which are expected to have a total installed capacity of 1.357 MW, or 41.8% of the total installed capacity for energy production."<sup>41</sup> 36 European Commission.

The energy policy and legislation are now fully aligned with the EU Energy Community prioritising energy efficiency and renewable energy; however coal still accounts for 60% of the electricity production. Planet. The country is highly vulnerable to climate-induced natural disasters, including earthquakes, floods, heat waves and forest fires.

North Macedonia Energy Balance: Primary: Total Crude: Natural Gas Liquids: Refinery Intake data was reported at 0.000 kl th in Jul 2024. This stayed constant from the previous number of 0.000 kl th for Jun 2024. North Macedonia Energy Balance: Primary: Total Crude: Natural Gas Liquids: Refinery Intake data is updated

monthly, averaging 0.000 kl th (Median) from Jan ...

North Macedonia is rich in natural resources, including mineral deposits, lush forests, water resources, agricultural potential, and renewable energy sources. The country is known for its rich mineral deposits, including chromium, lead, zinc, and copper, which contribute significantly to its economy.
