Is solar power a viable option in Norway?

Norwegian hydropower is currently so cheap that power companies do not consider it attractive to build solar power plants in Norway. In recent years, however, companies have started selling or leasing solar systems to private customers and businesses in Norway. Despite the low energy prices, solar power is growing rapidly in Norway.

Can you collect solar energy in Norway?

For example, the collection of solar energy was once regarded as gratuitous - especially in parts of the country that had a surplus of energy. Most homes in Norway are now equipped with smart meters allowing you to harvest solar energy, store it, and even sell it back to energy companies.

Does Norway have solar power?

Although Norway is far north, it is quite possible to produce solar energy here. For example, a small town south of Oslo, receives 1000 kilowatt-hours (kWh) per square meter annually. This is comparable to many parts of Germany, where solar power has boomed over the last 10 years.

4 ???· Norsk Renewables AS, formerly called Norsk Solar, is a vertically integrated independent power producer with a commercial offering that includes solar, wind, and storage. We are passionate about the clean energy transition, ...

However, solar power plants with a voltage of 1,000 V AC/1,500 V DC or less, do not need a license according to the Energy Act. Furthermore, all companies that conduct business related to solar power and/or solar power energy harvesting, are subject to a trading license (Nwg. "omsetningskonsensjon").
