How many solar plants does Norway have?

Norway reached 597 MW of cumulative installed PV capacity spread across 28,170 solar plants at the end of December, according to new figures from the country's grid operator, Statnett, via its Elhub subsidiary. The country added about 300 MW of new PV installations in 2023. By comparison, it installed 152.7 MW in 2022 and 42.7 in 2021.

Are Norwegian solar panels eco-friendly?

The ecological footprint of solar panels made with materials from Norway is therefore extremely small. REC Solar's factory in Fiskå in southwestern Norway has even been awarded a certificate for production of the world's cleanest silicon. Not only is Norwegian silicon production the world's cleanest, it is also the world's most energy efficient.

How much PV capacity does Norway have in 2023?

Norway reached 597 MW of cumulative installed PV capacity at the end of 2023. The authorities have attributed the record growth the country has posted over the past year to the successful connection of two large-scale PV plants.

How much solar power will Norway have by 2040?

For example, the Norwegian water resources and energy directorate (NVE) has stated that PV contributing with 7 TWh to the Norwegian electricity system by 2040 could be realistic (Lie-Brenna, 2021). The roadmap for the Norwegian PV industry suggests 2-4 TWh by 2030, provided 20-30% annual growth rates (FME-SUSOLTECH & Solenergiklyngen, 2020).

Do companies know about solar energy in Norway?

During interviews, some firms however, point out that they experience a limited attention and knowledge about PV. As a general indicator of attention to PV, we searched news media and parliamentary databases to observe the frequency of mentioning of solar energy compared to other renewable energy technologies in Norway.
