

November photovoltaic panel price trend

Are photovoltaic panel prices going down?

On average, prices in all module categories have been corrected downwards by around 10%. Never before in the history of photovoltaics have panel prices plummeted so significantly in such a short space of time.

Is the polysilicon spot price index higher than EnergyTrend?

Until late 2014, its polysilicon spot price index was 2% to 5% higher than that of EnergyTrend on an annual average; after that, however, it was 2% to 7% lower. In 2019 this spread widened significantly from 7% in the first quarter to 16% in the fourth quarter.

Why did polysilicon prices rise in the fourth quarter?

Those manufacturers that returned to the market in the fall increased the pressure on the price. Moreover, new polysilicon plants and factory expansions in China with very low production costs and a total capacity of 152,000 MT came on stream in the fourth quarter.

Solar photovoltaic costs have fallen by 90% in the last decade, onshore wind by 70%, and batteries by more than 90%. One of the most transformative changes in technology over the last few decades has been the ...
