

Off grid power solutions uk Canada

What types of off grid solutions do you offer?

Our range of Off Grid Solutions includes EasyGrid - a plug and play hybrid solution for homes and businesses looking for a straightforward, affordable way to generate their own power and Containerised systems - robust, semi bespoke systems ideal for isolated projects. We work with off grid power for a variety of sectors including:

Can you design an off-grid power system?

Alternatively, our friendly off-grid experts are happy to help you design your off-grid power system. Having tested 30 different makes of wind turbines, I chose the Leading Edge LE-300 horizontal wind turbine to power its off-grid LED street lights and communication solutions.

How can Offgrid pro help reduce energy costs?

This enables load shifting and the capitalisation of lower nighttime energy tariffs, vastly reducing electrical energy costs. I turned three weeks of power consumption into half a day with OffGrid Pro. Watch our latest case study to find out just how much difference an OffGrid Pro Power Solution can make.

Are off-grid energy systems reliable?

Off-grid energy systems are excellent and reliable in outage situations and are dependable should potential disasters strike. We are experts of out of the box thinking when it comes to renewable energy, particularly when there is no grid available or limited availability.

Do construction sites need off-grid power?

Often construction sites and quarries have no mains power nearby - even if they do, an intermittent supply means a reliable off-grid power solution is needed. The LE-300 wind turbine is renowned for its reliability and robustness, ensuring it continues producing power even during storm force winds.

Why do we work with off grid power?

We work with off grid power for a variety of sectors including: Location makes a grid connection too expensive or not possible. A need for uninterrupted power - protection from power cuts and the ability to power independently in all conditions. Reduction in energy bills and the ability to maximise the use of renewable energies.
