

Oman cleantech energy solutions

Who is developing a green fuels mega project in Oman?

An international consortium comprised of OQ, which is the Sultanate of Oman's global integrated energy company, InterContinental Energy, the leading dedicated green fuels developer, and EnerTech, a Kuwait government-backed clean energy investor and developer, is today announcing it is developing an integrated green fuels mega project in Oman.

What is wind and solar monitoring in central Oman?

The Consortium has been conducting wind and solar monitoring analysis in Al Wusta Governorate in Central Oman since 2019. Renewable power generation will benefit from very high and stable levels of solar and wind energy, exhibiting the optimal diurnal profile of strong wind at night and reliable sun during the day.

How will Oman's energy infrastructure contribute to decarbonization?

The project is also located near the coast for seawater intake and electrolysis. Existing energy infrastructure in Oman provides additional future options to develop synthetic fuels for the aviation sector, which will be critical for decarbonization.

Why should you invest in a green ammonia project in Oman?

"Oman has excellent solar resources and a strategic location for production of green ammonia. Acme Group has been in the forefront of green ammonia production with this project, and in Scatec we can capitalise on our expertise in renewables, project structuring and financing, execution and operation to accelerate the decarbonisation of the world.

Where is green ammonia produced in Oman?

The facility will be located in the Duqm Special Economic Zone of Oman. Once fully developed the facility is expected to produce up to 1.2 million tonnes of green ammonia annually. "Oman has excellent solar resources and a strategic location for production of green ammonia.
