Who is entalpia Europe?

It is worth mentioning that Entalpia Europe's business roots in the HVAC industry date back to 1997, thanks to the NINHUA GROUP CO., LTD company and since 2002 the ICOOL brand, highly specialized in the HVAC-R industry, with particular emphasis on refrigerants, and the production of components for systems air conditioning and ventilation.

Where is entalpia located?

The headquarters of Entalpia Europe, warehouse, production, logistics and human resources are located in Sieradz. In 2018, Entalpia received an ISO certificate. In Italy, Russia, Scandinavia, Germany, Greece and other European countries, the Company has numerous business partners and dynamically operating Distributors.

Why should you choose entalpia Europe?

Entalpia Europe's significant advantage, over the offer of other companies on the market, is that, unlike most companies supplying refrigeration copper, insulated coated polyethylene foam imported from Asia, Entalpia Europe produces insulation cover locally in Poland.

What does entalpia do?

Their main areas are production, distribution and providing HVAC-R solutions as well as green technology development, including PV panels, energy storage and more. Entalpia is one of the leading European cooling refrigerant bottlers in terms of the quantity of the refrigerants and the development stage of the process used.

What products does entalpia export?

Entalpia will export refrigerants and insulated copper tubes, fully legal eco refrigerants, ventilation and aircon products and full range of our new energy. Entalpia Europe in Poland will continue to expand its business with new products and brands available in the portfolio.

What are the market development trends in entalpia?

ENTALPIA: The market development trends will continue to focus on eco solutions, including low GWP refrigerants, economic solutions in green energy sector and closer look to costumers needs but with an eye on environment and technology and how to link it smoothly and use more widely. We are ready for that ecological trend.
