When designing solar systems, your client may have an existing solar system installed. OpenSolar gives you the capability to quickly and easily accommodate this if they would like to upgrade their system with more hardware. The first step in adding to an existing system is creating the system the customer already has on their home.

OpenSolar also simulates each inverter and MPPT performance separately based on array stringing configuration that is assigned to each inverter. This provides extra granularity than conventional solar modelling software, however, it does mean it is more computationally heavy and this introduces limitations on the maximum design size.

Based in Dominica, we offer products, installation and maintenance services. We offer a range of solar systems specially designed and tested for tropical conditions, from the most compact one able to power a simple phone/laptop/ ...
