

Can a solar array power Tokelau?

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu, essentially all energy in Tokelau currently is from imported petroleum.

What is the Tokelau PV project?

The Government of Tokelau sees the PV Project as the first step and therefore trial towards the long-term goal of energy independence based on renewable energy. The project is implemented by the Government of Tokelau and funded jointly by Government of New Zealand, Government of France, UNESCO Apia and UNDP Samoa.

What is Tokelau's energy policy?

The primary focus of the policy is the desire of Tokelau to become self-reliant in energy through a combination of renewable energy and energy efficiency measures.

Does Tokelau still use diesel?

Tokelau was said to be the first country in the world to have gone 100% solar, in 2013. Diesel usage, previously needed for power generators, is said to have dropped by 90 percent. Some power generation using diesel remains necessary as backup and in prolonged cloudy spells.

Does Tokelau have access to non-New Zealand capital funding?

Currently Tokelau has limited access to non-New Zealand capital funding. To assist addressing the energy sector issues in year 2004 the first ever Tokelau National Energy Policy and Strategic Action Planning (NEPSAP) was developed and approved after extensive preparation and consultations.
