Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

How many homes in Palestine use solar energy heaters?

Over half of all households in Palestine utilise solar energy heaters, although only 3% of houses depend on it as their main source. A 710kw photovoltaic plant was commissioned in September, 2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.

How much wind energy is used in the Palestinian territories?

It has been estimated that wind energy has the potential to account for 6.6% of energy usage in the Palestinian Territories.

Who is most affected by environmental pollution in Palestine?

The majority of individuals exposed to enhanced concentrations of pollutants are women and young children. The Palestinian Energy Authority (PEA) published a 'General Renewable Energy Strategy' in 2012, aiming for 10% of total domestic energy production and 5% of total energy consumption to come from renewable sources by 2020.

What are the health risks of biomass burning in Palestine?

About half of the Palestinian population - mainly in the rural areas, refugee camps, and Bedouins of North and South Governorates - are exposed daily to harmful emissions and other health risks from biomass burning that typically takes place in traditional stoves without adequate ventilation.
