

The country is rich in solar resources, with most areas receiving over 9 hours of sunlight daily, and 95% of its territory is suitable for efficient solar power generation. According to a World Bank report, Pakistan has 40 GW of solar potential, and using only 0.071% of its area for solar PV could meet the country's electricity needs.

The voltage of your battery is another critical factor to consider when choosing a battery for your solar system. The voltage of your battery should be compatible with the other components of your solar system, such as your solar panels and inverter. Choosing a battery with the wrong voltage can result in poor performance or even damage your ...
